SCORING AREA

It is important for both the judges and the referee to know exactly what the scoring area is. This will assist the Referee in determining if a blow is legal or if it was a foul. Only the Referee can determine if a blow was legal or a foul and if a foul, if it was accidental or intentional.

Fair blow in boxing

A fair blow in boxing is one delivered with the padded knuckle part of the glove on the front or side of the head or the front or side of the body above the belt.
